

Kelcy –

Welcome to Olin! Well, almost. I hope you are having a good pre-Olin summer. Things are going to change a lot in September, so get ready!

I have been at Olin for one year so far, so both you and I will be pretty new to the whole thing. Even though some of my degrees say "Electrical Engineering" on them, I am really a Computer Engineer at heart.

My research is mostly in novel ways to use computers, and in particular devices called Field-Programmable Gate Arrays (FPGAs). More about that if and when you care to hear more.

I teach mostly junior ECE types in my Computer Architecture and Digital VLSI classes. However, I have a great interest in all things Engineering, especially "Green", or environmentally-conscious, engineering.

So, enough about me, let's concentrate on you.

As your first college assignment, please email me some sort of-introduction so I can get to know you a little better.

Some things you might include:

- What are your goals at Olin?
- Do you have any thoughts about your first semester here at Olin?
- Anything else - questions or concerns, anything.

Finally, please feel free to contact me anytime,

Email: [mark.chang@olin.edu](mailto:mark.chang@olin.edu)

Phone: 781.292.2559

AIM: mchangolin

I look forward to meeting you in the fall.

PS: you can find this letter here:
